**Subject:** Press Inquiry about Superfund  
removed.txt

Hi Julia-I'm working on a story for today about Colorado mine spill, hoping to tap into your expertise for background on mines in the Superfund program.

Realize the mine in spill was not in the program, but we want to explore how local opposition helped keep it out of the program, and explain how Superfund works and what benefits it offers.

Here are the main things we're looking for:

--how many mines are currently on the National Priorities List? Can we get a list of those or is there a way to search on the Superfund website?

--does the EPA have any estimate on total number of abandoned mines? (in the western US and/or nationwide, or whatever is available)

--is there a gauge of how often resistance to a Superfund designation by local officials has prevented a site's listing?

Specific to Gold King Mine:

--was a preliminary assessment ever completed on the Gold King Mine or for a group of mines including Gold King?

--it's my understanding that the EPA has said a water treatment plant estimated to cost \$12-\$17m (and \$1M a year to operate) would be able to clean the water in the Animas. Is that correct? And if so, is it the type of expense that Superfund would cover?

CC'd Rich Mylott and Ellen Knickmeyer with The AP and also left you a voice mail. Please give me a call when you can.

Hoping to get whatever answers we can as quickly as possible b'c story is already live and the plan is to make this our main focus today.

Thanks much-

Matt Brown
